TECBox & Services Installation Manual

IIS setup

- Go to Control Panel > Programs > Programs and Features.
- Turn Windows features on or off.

- Enable Internet Information Services.
- Under World Wide Web Services > Application Development Features.

TECBoxService Installation

- Go to the following link and download the latest version of the project
  https://github.com/JoDaniel1412/TECBoxService/releases
- Open IIS Manager and under your desktop, right click on Sites, then Add Website.

- Then make sure to put the service under <C:/inetpub/wwwroot/ > and set the port to 8080.
